
Alea SRL top management, in compliance with the "FSC STD 40-004" standards, undertakes every effort to identify the sources of wood products labeled in accordance with FSC® principles.

The company policy wants to avoid the trade and procurement of wood illegally harvested, in violation of traditional and civil rights, in forests with high preservation values that are threatened by management activities, in forests that have been converted to plantations or into non-forest use, in forests where genetically modified trees are planted.

ALEA SRL agrees to avoid the breach of any Fundamental ILO Convention in reference to:

- Freedom of association and effective respect of the right to collective negotiation;
- Abolition of all forms of forced labor;
- Abolition of child labor;
- Abolition of discrimination.

If proved impossible to identify the origin of some products, Alea will replace those materials with others whose origin is 100% checked.

Alea agrees to apply and maintain within the organization the use of FSC® certified wood products. Alea wants to provide customer satisfaction, through the official acknowledgement of wood sourced from sustainable forests or plantations harvested under the FSC® compliance.

The commitment is, in particular, to train all the employees involved in activities implementing the FSC® compliance.

The modalities of control systems applied to chain of custody are listed in the "COC manual".
